

Software Engineering Group Projects - Fourth Iteration Checkpoint

Due Date: Fri 1st December 2017 (7pm)

We are running these projects with **four 2-week iterations**. At the end of each iteration you should meet with your supervisor and give them a demonstration of your software. You should be able to show that you have made progress, and that your software has more (or better) features than it did at the last demo.

Print out this form, take it with you when you demonstrate to your supervisor, and ask them to complete and sign it. Then **scan the signed sheet and submit it to Cate** by the deadline. You should also submit a set of screenshots showing the current state of your version control repository, your CI build, and your project plan.

Group Number:

Group Members:

Supervisor name: *WILL KNOTENWASZ*

I certify that in this iteration I feel the group has... (check one)

- * not been able to demonstrate any new working software
 - * shown me something working, but a bit less than I had hoped for, or not what we agreed
 - * adequately delivered the features that we agreed on
 - * made better progress than I expected
 - ☒ * made amazing progress with wonderful results
-

When preparing the final report and presentation, two things to highlight are:

- * *INSIGHTS INTO FULL RANGE OF TECHNIQUES TRIED + WHICH ONE WORKS BEST*
- * *REFLECTIONS ON DEV OPS FOR MACHINE LEARNING*
