

Image Deblurring - Checkpoint 3

Group 8

R. Fernández Mir
R. Hu

C. Hawkes
R. Lee Mekhtieva

R. Holland
A. Papadopoulos

1 Main Features

As can be seen in the scanned document which accompanies this report, our main tasks to be done by the end of next sprint are the following:

1. Re-colourise the outputs.
2. Wrap the deblurring model in a mobile app.

2 Risk Discussion

As most of the risks for the project were identified in the first checkpoint meeting and worked over during this sprint there are no new risks to be considered.

3 Trello boards

This is the state of our Trello board throughout the sprint.

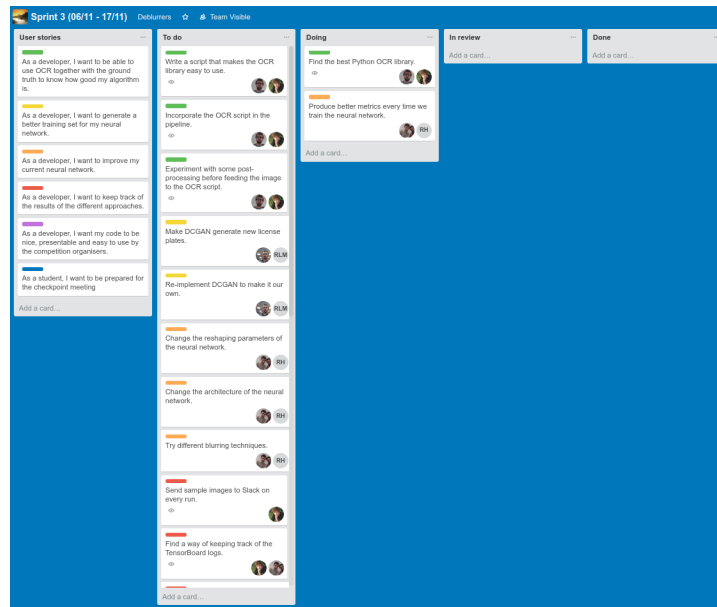

Figure 1: Trello board after the sprint planning (06/11).

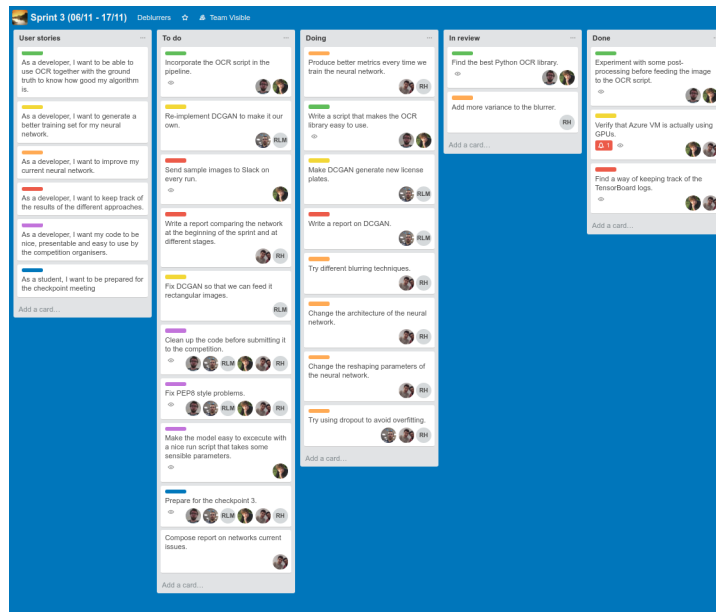

Figure 2: Trello board in the middle of the sprint (12/11).

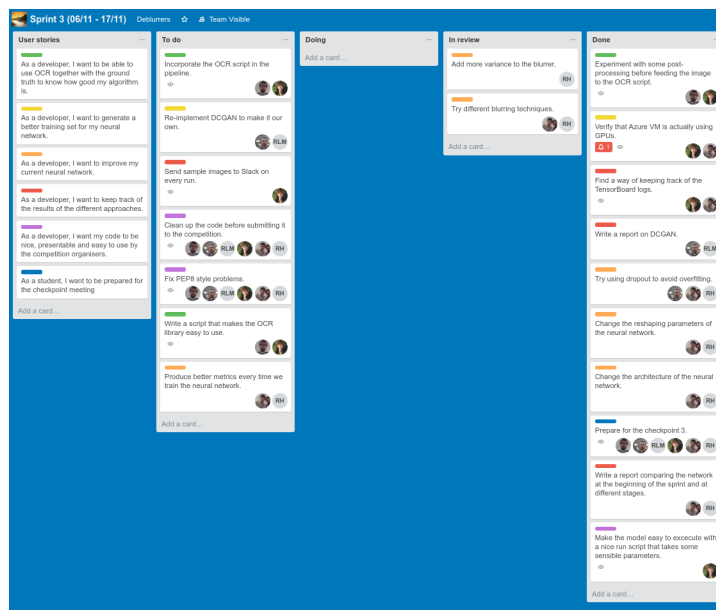

Figure 3: Trello board at the end of the sprint (17/11).

4 Git history

This is how our git network looks like:

5 Automated builds

Finally, this is a screenshot of the current state of TravisCI.

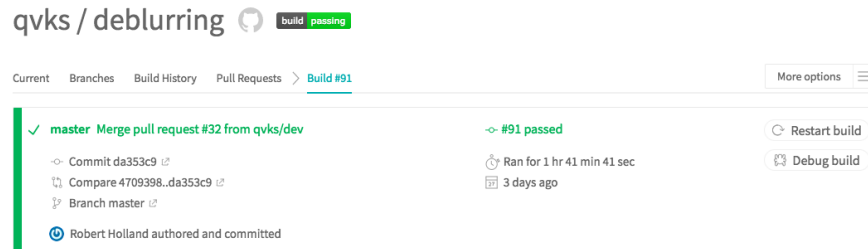

Figure 5: Last build in master.
